

SVS BROWN SHIPLEY BALANCED FUND

Factsheet to 31 March 2024

Fund Objective

The Fund aims to achieve growth through a combination of capital and income over the medium term (at least five years). The Fund will invest, directly and indirectly, in a mixture of shares and fixed interest securities (being sovereign, investment grade and non-investment grade bonds). The allocation between the shares and fixed interest securities in which the Fund invests will be actively managed and will vary in response to short term market conditions. However, the Fund operates a balanced strategy, maintaining a balance between shares and fixed interest securities, with the allocation to shares remaining within a 40% to 85% range. The Fund excludes issuers that derive more than 10% of revenue from thermal coal extraction or power generation, those that are involved in controversial weapons, issuers subject to EU arms embargoes and those that are deemed in violation of the UN Global Compact principles for over 3 years. In addition, the Fund integrates environmental, social and governance (ESG) factors in its investment process.

Commentary

The end of March also marked the end of the first quarter, a period during which the fund was supported by good returns from equity markets as well as from selected investments in the bond space. The US equity exposure particularly drove returns, with notable gains from the technology holdings in the portfolio. Over the quarter, a number of stocks in the sector were reduced following good returns, whilst a new position was added to the portfolio, American Tower Corp – a leading company in the multitenant communications real estate sector. UK equities lagged given the lower exposure to growth assets in the region. In fixed income markets, it was the more economically sensitive sectors that produced the best returns over the quarter, this supporting performance from the Federated Hermes High Yield Fund and the Pimco Emerging Market Bond Fund. The portfolio also benefitted from strong returns from the alternatives holdings over the quarter, this demonstrating the diversification qualities of the asset class within the portfolio.

The fund moved into the second quarter positioned to reflect a more neutral outlook across asset classes. Within that, however, the preference remains to be invested in sectors and regions which we feel are attractively valued and where we think macroeconomic prospects are better than expectations. The overall balanced exposure in the portfolio versus our long-term strategic asset allocation reflects the robust economic environment but also possible headwinds from geopolitical risks and elevated valuations in some markets.

Past performance is not a guide to future performance. The value of your investments represents the cumulative effect of all of the underlying investments and can fall as well as rise. The value of an investment or any income received from it, is not guaranteed and you may not get back some or all of the amount invested. Investors should seek tax advice to understand their personal liability for investment income and/or gains. This will depend on their personal circumstances and the prevailing tax rules, which are subject to change. Please refer to the Key Investor Information Document and the fund prospectus for further fund information.

29 July 2014	79	£525.93 m	01 Dec, 01 Mar, 01 Jun, 01 Sep	31 Jan, 30 Apr, 31 Jul, 31 Oct

*Net Historic Yield on current portfolio constituents, net of fees as at 31/03/2024. Fees taken 50% from income and 50% from capital.

†The ongoing charges figure is based on the last year's expenses (ending 28/02/2023) and may vary from year to year. The transaction fee is paid by the fund due to the acquisition and disposal of investments.

Investment Risks - This fund predominately gains exposure to a combination of income and capital growth assets through investment in other investment funds whose individual risk profile may not match that of the Balanced fund, while exposure to UK markets is generally through direct equity holdings. Global currency fluctuations contribute to fluctuations in the value of the investment. Investment Trusts, Sovereign Bonds and Structured Products do not represent significant holdings but where used carry specific investment risks; with structured products there is a risk of insolvency of the underlying issuer, while Investment Trusts may borrow to invest and, where borrowing is used, the gains or losses in those underlying investments are exaggerated. The value of bonds are affected by relative movements in interest rates. Please refer to the Key Investor Information Document and the fund prospectus for further fund information.

Distribution and Fund Administration

This document is provided to investors for the purpose of information only. It is not for onward distribution to any other type of client. The views, opinions and forecasts are those of the fund manager. This material should not be relied upon as sufficient information to support an investment decision. This material is for information only and does not constitute an offer or solicitation of an order to buy or sell any securities or other financial instruments, or to provide investment advice or services. The dealing price may include a dilution levy where the fund experiences large inflows and outflows of investments. Further details are available in the Prospectus.

Portfolio positions are based on gross asset valuations at global close (not official NAV time). Historic yields distributions declared over the past 12 months.
