

# SVS BROWN SHIPLEY DYNAMIC FUND

Factsheet to 29 February 2024

## Fund Objective

The Fund aims to achieve growth through a combination of capital and income over the long term (at least ten years). The Fund will invest, directly and indirectly, in a mixture of shares and fixed interest securities (being sovereign, investment grade and non-investment grade bonds). The allocation between the shares and fixed interest securities in which the Fund invests will be actively managed and will vary in response to short term market conditions. However, the Fund operates a dynamic strategy, meaning that the allocation to shares will remain within a 70% to 100% range, with a focus on higher risk, growth based assets.

## Commentary

Markets in February saw diverging returns with equities broadly higher over the month whilst bond markets came under pressure. Better than expected US growth data alongside robust forward-looking economic indicators suggested that the medium term outlook for global growth has improved.

With evidence of a potential upturn in fortunes for the global economy, the portfolio is now positioned to reflect a more neutral outlook across asset classes. As such, the allocation of equities versus bonds is now in line with our long-term, strategic asset allocation, with the exposure to equities increased and the allocation to bonds reduced at the beginning of February. This continues a moderation of the defensive positioning of the portfolio that was started at the end of 2023. During February we sold the US low-volatility equity fund, reinvesting in a more broad based US equity fund given the improved growth outlook for the region. We also added a new fund that gives exposure to global small cap

companies given attractive valuations and the likelihood of less pressure from rising interest rates. To fund the increased equity position, the exposure to US treasuries was reduced, reflecting our view that markets expect too many rate cuts and for them to come too soon.

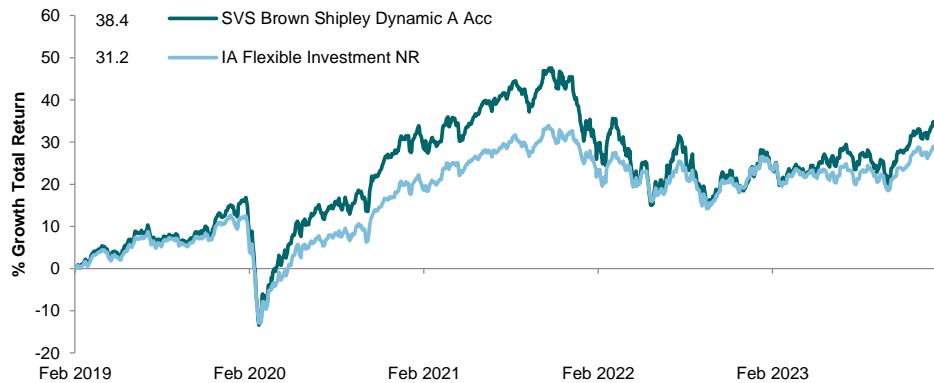

Within bonds, we increased the exposure to the high-quality European Investment Grade market given attractive yields and also given valuations compared to their own history. Finally, we continue to maintain a reduced exposure to riskier bonds in the portfolio.

\*Net Historic Yield on current portfolio constituents, net of fees as at 29/02/2024. Fees taken 50% from income and 50% from capital.

†The ongoing charges figure is based on the last year's expenses (ending 28/02/2023) and may vary from year to year. The transaction fee is paid by the fund due to the acquisition and disposal of investments.

**Investment Risks** - This fund predominately gains exposure to higher risk UK and international growth based assets through investment in other investment funds whose individual risk profile may not match that of the Dynamic fund, while exposure to UK markets is generally through direct equity holdings. Global currency fluctuations contribute to fluctuations in the value of the investment. Investment Trusts, Sovereign Bonds and Structured Products do not represent significant holdings but where used carry specific investment risks; with structured products there is a risk of insolvency of the underlying issuer, while Investment Trusts may borrow to invest and, where borrowing is used, the gains or losses in those underlying investments are exaggerated. The value of bonds are affected by relative movements in interest rates. Please refer to the Key Investor Information Document and the fund prospectus for further fund information.

## Distribution and Fund Administration

This document is provided to investors for the purpose of information only. It is not for onward distribution to any other type of client. The views, opinions and forecasts are those of the fund manager. This material should not be relied upon as sufficient information to support an investment decision. This material is for information only and does not constitute an offer or solicitation of an order to buy or sell any securities or other financial instruments, or to provide investment advice or services. The dealing price may include a dilution levy where the fund experiences large inflows and outflows of investments. Further details are available in the Prospectus.

Portfolio positions are based on gross asset valuations at global close (not official NAV time). Historic yields distributions declared over the past 12 months.
