

## Active Model Portfolio Service

Factsheet to 30 June 2020

### Portfolio Objective

The objective of this portfolio is to achieve capital growth, combined with volatility and risk which are both below average. The portfolio will invest in bonds issued by governments as well as companies, but will look to achieve a balanced outcome by also investing in equities and alternative assets such as commercial property and Absolute Return funds. Income will be generated from these investments, but obtaining a high overall yield will not be a prime consideration. This portfolio uses an **external risk profile**, Dynamic Planner, which advises the lowest medium (i.e. 4 out of 10) attitude to investment risk. The Manager aims to achieve the objectives over a 5 year period.

### Commentary

It's been a very strong quarter for equities and credit as central banks and governments provided enormous amounts of stimulus and economies started to reopen. Despite the strong rebound in risk assets, traditional portfolio hedges such as government bonds and gold have held up well. US Treasuries are up about 9% year to date, while gold is up close to 18%.

As economies have started to reopen, economic data has shown signs of a sharp rebound. For example, US retail sales rose 17% month on month in May, while UK retail sales rebounded by 12%. While sales are still down 6% and 13% year on year respectively, the speed and magnitude of the bounce back is a clear positive. The other positive is that central banks globally have made clear that they stand willing to use their full firepower to keep government and corporate borrowing costs low.

The end of June is clearly the half way mark for the year and what strikes me most is how mediocre the UK stock market has been compared to most other major markets. The reason is primarily the makeup of the UK market, industry sector wise there are very few offsets for the Oils, Banks, Travel, Property, Auto's, Transport, Telecoms, Aerospace and so on which are all down between 20 and 50% this year. Only two sectors are up meaningfully, Leisure Goods and Tech' Hardware, and these two sectors combined make up less than 5% of the index and Brexit and the accompanying UK-EU trade deal hasn't really been on the radar yet.

Overall, the market has rallied on the back of fiscal and monetary stimulus, combined with the reopening of economies. We believe the monetary support is here to stay, but that in some countries there is a risk that fiscal stimulus may become less generous.

### Portfolio Information

<b>Launch Date:</b>	01 June 2010	<b>Net yield***:</b>	2.00%

The past performance of an investment is not a reliable indicator of future results. The value of investments and any income from them may fluctuate and are not guaranteed. The value of your investments represents the cumulative effect of all of the underlying investments and can fall as well as rise. Performance is calculated on a daily basis and the portfolios are rebalanced on a quarterly basis, at the beginning of, March, June, September and December. This reflects the asset allocation at the beginning of the month, although it can take up to 5 business days for changes to be incorporated. Total return, gross of

**Investment Risks** - This model portfolio predominately gains exposure to income producing assets through investment in other investment funds whose individual risk profile may not match that of the model portfolio. Exposure to UK and international markets is through collective funds. Global currency fluctuations contribute to fluctuations in the value of the investment. Sovereign and Corporate Bonds do not represent significant holdings but where used carry specific investment risks; the value of bonds are affected by relative movements in interest rates.

### Distribution and Portfolio Information

The information contained in this factsheet is provided by Brown Shiple to professional advisors for information purposes only and must not be communicated to any other person. It does not constitute investment advice and must not be treated as a recommendation or an offer or solicitation for investment. Except insofar as liability under any statute cannot be excluded, neither Brown Shiple nor any employee or associate of them accepts any liability (whether arising in contract, tort, negligence or otherwise) for any error or omission in this document or for any resulting loss or damage whether direct, indirect, consequential or otherwise suffered by the recipient of this document. More information on the Internal and external risk ratings can be explained upon request.

Brown Shiple is a trading name of Brown Shiple & Co Limited, is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority Registered in England and Wales No. 398426. Registered office: Founders Court, Lothbury, London EC2R 7HE. Brown Shiple's parent company is KBL European Private Bankers which, from Luxembourg, heads a major European network of private bankers. Telephone calls may be monitored or recorded for security purposes.

**Distribution Technology** ("DT") is a leading provider of financial planning & front office wealth management technology. DT has reviewed and profiled a range of investment portfolios offered by Brown Shiple within the risk profiles used on the DT Dynamic Planner® platform. The main objective of the DT risk profiles and fund risk profiling service is to provide financial advisers and their clients with a meaningful measure of the long-term investment risk of fund strategies and a mechanism for selecting funds appropriate for investor risk appetites and capacity for risk.
