

SVS BROWN SHIPLEY DYNAMIC FUND

Factsheet to 30 June 2024

Fund Objective

The Fund aims to achieve growth through a combination of capital and income over the long term (at least ten years). The Fund will invest, directly and indirectly, in a mixture of shares and fixed interest securities (being sovereign, investment grade and non-investment grade bonds). The allocation between the shares and fixed interest securities in which the Fund invests will be actively managed and will vary in response to short term market conditions. However, the Fund operates a dynamic strategy, meaning that the allocation to shares will remain within a 70% to 100% range, with a focus on higher risk, growth based assets. The Fund excludes issuers that derive more than 10% of revenue from thermal coal extraction or power generation, those that are involved in controversial weapons, issuers subject to EU arms embargoes and those that are deemed in violation of the UN Global Compact principles for over 3 years. In addition, the Fund integrates environmental, social and governance (ESG) factors in its investment process.

Commentary

The end of June marked the end of both the second quarter and the first half of 2024. Compared to the previous quarter, Q2 was more of a mixed bag in equity markets with US stocks benefiting from a strong performance from technology stocks whilst European equities lagged, largely due to politics rather than economic fundamentals. UK equities broadly performed well over the quarter with stocks helped by headline inflation data reaching the Bank of England's 2% target.

Turning to fixed income, the asset class has generally had a mixed Q2, with relatively unspectacular returns. The economic environment tended to support the riskier sub sectors of the bond market, although lower risk US treasuries were in demand towards the end of the quarter with investors concerned about political uncertainty in Europe.

The second quarter of 2024 saw additional gains for the portfolio, with returns supported by a further increase in the overall allocation to equities in mid-May at the expense of the fixed income exposure in the portfolio. This continues the gradual increase in the weighting to equities that began at the end of 2023, reflecting our more positive views on global growth and the future path of Central Bank interest rates.

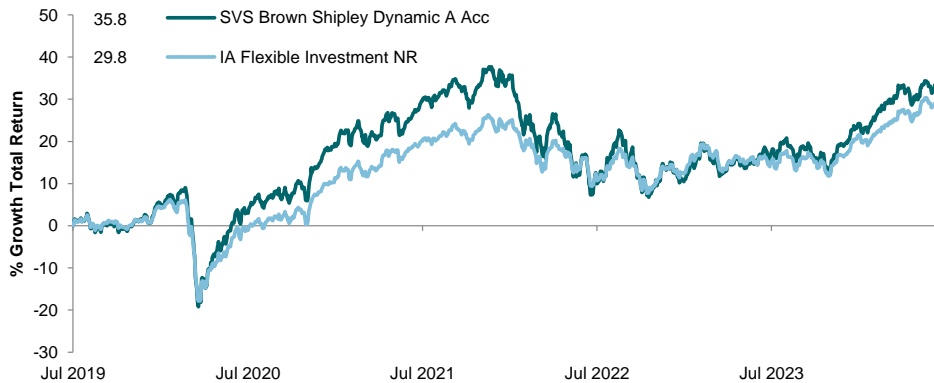

Looking forward, the globally diversified approach to the portfolio is expected to reduce volatility and to mitigate the impact of downside risks (should they materialise). Moving into the second half of the year, we continue to keep a close eye on the macro economy and the path of global interest rates, as well as monitoring the impact of more 'local' events including geopolitics and elections.

The Investment Association sector is used in the above graph for comparative purposes only. This comparator benchmark has been chosen as it best reflects the asset allocation of the Fund and as it provides a direct peer group comparator for SVS Brown Shipley Dynamic A Acc.

Past performance is not a guide to future performance. The value of your investments represents the cumulative effect of all of the underlying investments and can fall as well as rise. The value of an investment or any income received from it, is not guaranteed and you may not get back some or all of the amount invested. Investors should seek tax advice to understand their personal liability for investment income and/or gains. This will depend on their personal circumstances and the prevailing tax rules, which are subject to change. Please refer to the Key Investor Information Document and the fund prospectus for further fund information.

*Net Historic Yield on current portfolio constituents, net of fees as at 30/06/2024. Fees taken 50% from income and 50% from capital.

†The ongoing charges figure is based on the last year's expenses (ending 29/02/2024) and may vary from year to year. The transaction fee is paid by the fund due to the acquisition and disposal of investments.

Investment Risks - This fund predominately gains exposure to higher risk UK and international growth based assets through investment in other investment funds whose individual risk profile may not match that of the Dynamic fund, while exposure to UK markets is generally through direct equity holdings. Global currency fluctuations contribute to fluctuations in the value of the investment. Investment Trusts, Sovereign Bonds and Structured Products do not represent significant holdings but where used carry specific investment risks; with structured products there is a risk of insolvency of the underlying issuer, while Investment Trusts may borrow to invest and, where borrowing is used, the gains or losses in those underlying investments are exaggerated. The value of bonds are affected by relative movements in interest rates. Please refer to the Key Investor Information Document and the fund prospectus for further fund information.

Distribution and Fund Administration

This document is provided to investors for the purpose of information only. It is not for onward distribution to any other type of client. The views, opinions and forecasts are those of the fund manager. This material should not be relied upon as sufficient information to support an investment decision. This material is for information only and does not constitute an offer or solicitation of an order to buy or sell any securities or other financial instruments, or to provide investment advice or services. The dealing price may include a dilution levy where the fund experiences large inflows and outflows of investments. Further details are available in the Prospectus.

Portfolio positions are based on gross asset valuations at global close (not official NAV time). Historic yields distributions declared over the past 12 months.
