

SVS BROWN SHIPLEY BALANCED FUND

Factsheet to 30 April 2026

Fund Objective

The Fund aims to achieve growth through a combination of capital and income over the medium term (at least five years). The Fund will invest, directly and indirectly, in a mixture of shares and fixed interest securities (being sovereign, investment grade and non-investment grade bonds). The allocation between the shares and fixed interest securities in which the Fund invests will be actively managed and will vary in response to short term market conditions. However, the Fund operates a balanced strategy, maintaining a balance between shares and fixed interest securities, with the allocation to shares remaining within a 40% to 85% range. The Fund excludes issuers that derive more than 10% of revenue from thermal coal extraction or power generation, those that are involved in controversial weapons, issuers subject to EU arms embargoes and those that are deemed in violation of the UN Global Compact principles for over 3 years. In addition, the Fund integrates environmental, social and governance (ESG) factors in its investment process.

Commentary

Global markets rallied strongly in April despite continued heightened geopolitical tensions. The conflict in the Middle East pushed oil above USD 110 per barrel, yet despite this it was a good month for risk assets. Growth led the way with strong gains from the Tech sector helping to push the S&P 500 and Nasdaq to record highs. Emerging market equities were also in demand with strong performances from Taiwan and South Korea in particular.

Fixed income markets had a mixed month as inflation concerns pressured yields, weighing on government bonds in particular. UK gilts suffered from political uncertainty.

We made several changes to the fixed income investments in the portfolio over the month, increasing quality within the asset class. The UK gilts holding was reduced given our cautious view on the region, with investments made in Eurozone government bonds and US Treasuries (both currency hedged) given the attractive yields relative to riskier bonds. Exposure to global high yield

bonds was also reduced whilst we also rotated some of the emerging market bond exposure towards higher quality local currency debt, reducing hard currency debt exposure. Finally, we also added a new hedge fund to the portfolio with an investment in AQR Apex. The fund invests across a wide range of asset classes and strategies and adds further diversification to the portfolio.

Overall, we maintain a moderate equity overweight versus bonds, but with an increased exposure to higher quality investments within the fixed income asset class.

The Investment Association sector is used in the above graph for comparative purposes only. This comparator benchmark has been chosen as it best reflects the asset allocation of the Fund and as it provides a direct peer group comparator for SVS Brown Shipley Balanced A Acc.

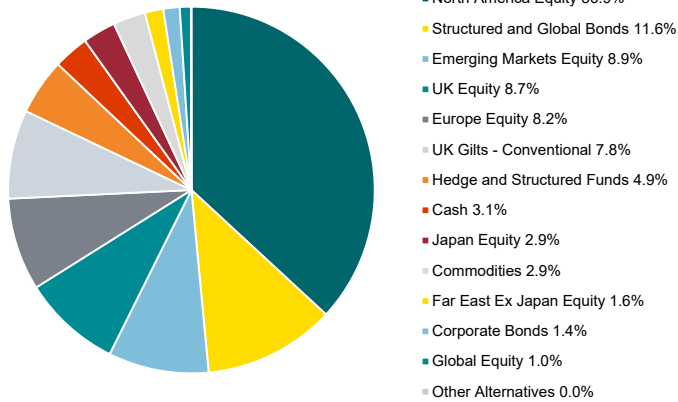

Past performance is not a guide to future performance. The value of your investments represents the cumulative effect of all of the underlying investments and can fall as well as rise. The value of an investment or any income received from it, is not guaranteed and you may not get back some or all of the amount invested. Investors should seek tax advice to understand their personal liability for investment income and/or gains. This will depend on their personal circumstances and the prevailing tax rules, which are subject to change. Please refer to the Key Investor Information Document and the fund prospectus for further fund information.

29 July 2014	86	£666.85 m	01 Dec, 01 Mar, 01 Jun, 01 Sep	31 Jan, 30 Apr, 31 Jul, 31 Oct

*Net Historic Yield on current portfolio constituents, net of fees as at 46142. Fees taken 50% from income and 50% from capital.

†The ongoing charges figure is based on the last year's expenses (ending 28/02/2025) and may vary from year to year. The transaction fee is paid by the fund due to the acquisition and disposal of investments.

Investment Risks - This fund predominately gains exposure to a combination of income and capital growth assets through investment in other investment funds whose individual risk profile may not match that of the Balanced fund, while exposure to UK markets is generally through direct equity holdings. Global currency fluctuations contribute to fluctuations in the value of the investment. Investment Trusts, Sovereign Bonds and Structured Products do not represent significant holdings but where used carry specific investment risks; with structured products there is a risk of insolvency of the underlying issuer, while Investment Trusts may borrow to invest and, where borrowing is used, the gains or losses in those underlying investments are exaggerated. The value of bonds are affected by relative movements in interest rates. Please refer to the Key Investor Information Document and the fund prospectus for further fund information.

Distribution and Fund Administration

This document is provided to investors for the purpose of information only. It is not for onward distribution to any other type of client. The views, opinions and forecasts are those of the fund manager. This material should not be relied upon as sufficient information to support an investment decision. This material is for information only and does not constitute an offer or solicitation of an order to buy or sell any securities or other financial instruments, or to provide investment advice or services. The dealing price may include a dilution levy where the fund experiences large inflows and outflows of investments. Further details are available in the Prospectus.

Portfolio positions are based on gross asset valuations at global close (not official NAV time). Historic yields distributions declared over the past 12 months.
